INTRODUCTION

“He is introverted, exceptionally focused, enjoys finding a unique point of view, and has strong work ethics.” That is what my friends and former coworkers say about me.

I believe multitasking leads to failure. That is why I prefer working on longer targeted sessions. I am future-focused and a long-term thinker. I have optimized my life for creating and am always willing to learn.

Having spent my previous career as a mechanical engineer, I found myself and the environment lacking challenges. It is time to stir things up and start anew.

How can one not be passionate about tackling the obstacles of web development?

EDUCATION

Kecskemét College Faculty of Mechanical Engineering and Automation

Mechanical engineer of plastic manufacturing, 1996 - 2000

LANGUAGES

English - Swedish

Professional working proficiency

Hungarian

Native or bilingual proficiency

TECH STACK

HTML5

CSS3

Javascript

React

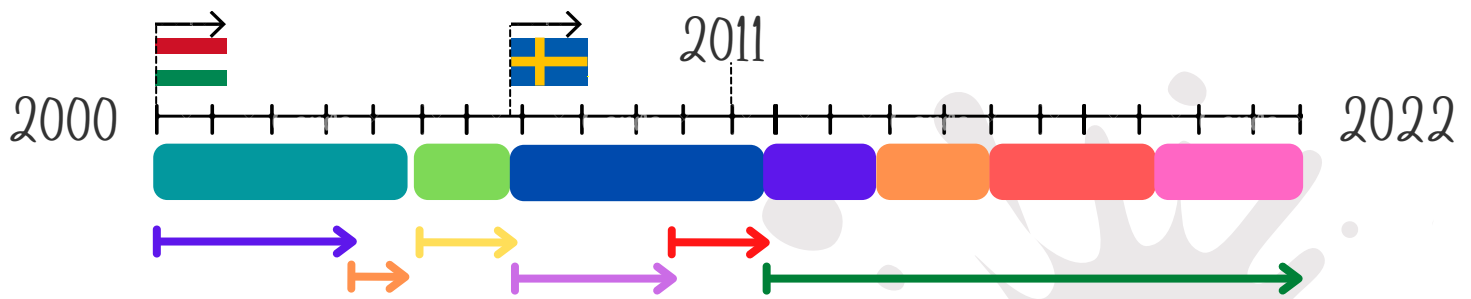

Github

VS Code

Responsive design; APIs; Web architecture; Web design; React basics; Bootstrap; Agile; Scrum; Kanban; npm; Console junkie; Bug hunter

I may be a junior Web developer but not a junior in hard work ↓

JOB TITLES
